

SWAYAM NETKE

AI & Data Science Student | Machine Learning / Deep Learning | Open to Internships

Mumbai, India | +91 84519 82151 | swayam2464@gmail.com | [github](#) | [linkedin](#) | [portfolio](#)

PROFILE

Third-year B.Tech student in Artificial Intelligence & Data Science with hands-on experience across the full ML lifecycle — data preprocessing, model training, evaluation, and deployment. Built and trained custom neural networks (CNNs, MLPs) using PyTorch and TensorFlow for computer vision applications, alongside classical ML with Scikit-learn and XGBoost. Experienced with backend development (FastAPI, REST APIs) and NLP. Currently applying ML to a production recommendation system as an intern. Seeking an internship in AI/ML, Deep Learning, or Data Science.

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java, C

Machine Learning & Deep Learning: TensorFlow, Keras, PyTorch, TensorFlow Lite, YOLOv8, XGBoost, Scikit-learn, CNNs, MLPs, Predictive Modeling, NLP

Computer Vision: OpenCV, MediaPipe, Object Detection, Real-time Inference, Facial Emotion Recognition, Gesture Recognition

Data Science: Pandas, NumPy, Matplotlib, Seaborn, EDA, Feature Engineering, Model Evaluation

Web & Backend: FastAPI, REST APIs, Streamlit, React, Vite, HTML/CSS

Automation & Databases: Scrapy, Selenium, BeautifulSoup, MySQL, MongoDB, Git, GitHub

EXPERIENCE

AI & Full Stack Intern — [Kaevron Technologies](#)

Jul 2026 – Present

- Developing an ML-powered job recommendation system for Scalerix; cleaned and preprocessed internship/job data using Pandas and NumPy.
- Engineered features and trained recommendation and prediction models with Scikit-learn and TensorFlow, improving recommendation relevance based on candidate profile attributes.
- Collaborating with the team to integrate the trained model into the Scalerix platform.

Data Science Intern — [ElevanceSkills](#)

Jul 2026 · Completed

- Built the MultiVision AI Suite, a 7-model AI platform, as a capstone project applying data preprocessing, EDA, feature engineering, and model evaluation.

Freelance Data Engineer & Automation Developer — *Fiverr*

2026 – Present

- Built scalable web scraping pipelines with Scrapy and Selenium to automate structured, multi-domain data collection, delivering analysis-ready datasets to clients.

Technical Writer — *Medium*

2025 – 2026

- Published technical articles on Python, machine learning, automation, and data engineering for a public audience.

Hackathon Competitor — *Various Competitions*

2026 – Present

- Rapidly prototyped machine learning backends and REST API integrations under strict time constraints across multiple hackathons.

PROJECTS

MultiVision AI Suite — 7-Model AI Platform (Capstone) ([PyTorch](#), [TensorFlow Lite](#), [YOLOv8](#), [XGBoost](#), [MediaPipe](#), [OpenCV](#), [Streamlit](#))

- Unified 7 independently trained models — face analysis, driver drowsiness detection, voice emotion recognition, real-time gesture recognition, and object detection — into a single web interface.
- Trained custom neural networks from scratch on UTKFace, RAF-DB, and a driver drowsiness dataset.

[Live Demo](#) | [GitHub](#)

ClosetAI — AI Wardrobe Stylist ([FastAPI](#), [React](#), [ML](#), [Computer Vision](#))

- Engineered a full-stack AI styling app with a FastAPI backend and React frontend, including a computer vision pipeline for automatic garment color extraction, a 6-dimension outfit scoring engine, and a feedback-driven "Style DNA" model.

[Live Demo](#) | [GitHub](#)

AI-Based Road Accident Risk Prediction System ([Python](#), [Scikit-learn](#), [Pandas](#), [NumPy](#))

- Trained and evaluated classification models on real-world accident data, achieving ~75% test accuracy; tuned decision thresholds to prioritize recall on high-severity cases.

[Live Demo](#) | [GitHub](#)

Customer Churn Prediction System ([Python](#), [Scikit-learn](#), [Streamlit](#))

- Built and deployed a scikit-learn classification model behind an interactive Streamlit app that predicts telecom customer churn likelihood in real time.

[Live Demo](#) | [GitHub](#)

EDUCATION

B.Tech — Artificial Intelligence & Data Science

2024 – 2028

Shah and Anchor Kutchhi Engineering College, Mumbai | CGPA: 8.52 / 10

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Artificial Intelligence, Machine Learning, Probability & Statistics

CERTIFICATIONS

Data Science Master Virtual Internship — Siemens | Python & C Training — IIT Bombay | PCA — Coursera | Pandas: Data Manipulation — Kaggle | Data Analytics Job Simulation — Forage
