

SWAYAM NETKE

AI & Data Science Student | Python / ML Developer | Open to Internships

Ghatkopar, Mumbai | +91 84519 82151 | swayam2464@gmail.com | github.com/swayamworks | swayam-netke.netlify.app

PROFILE

Third-year B.Tech student in Artificial Intelligence & Data Science with hands-on experience across the machine learning lifecycle — data preprocessing, model training, model evaluation, and model deployment. Experienced building backend services with FastAPI and REST APIs, and automating large-scale data pipelines with Python. Applied NLP techniques for sentiment analysis and built computer vision components for a deployed full-stack AI application. Seeking an internship in AI/ML, Data Science, or Python backend development to contribute to production AI systems.

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java, C

AI & Machine Learning: Scikit-learn, NLP, Predictive Modeling, Model Evaluation, Computer Vision, Pandas, NumPy, Matplotlib, Seaborn

Backend & APIs: FastAPI, REST APIs, Backend Development, React, Vite, HTML/CSS

Data Engineering & Automation: Data Preprocessing, Data Pipelines, Scrapy, Selenium, BeautifulSoup, Requests

Databases: MySQL, MongoDB

Developer Tools: Git, GitHub, VS Code

EXPERIENCE

AI & Full Stack Intern — *Kaevron Technologies*

Jul 2026 – Present

- Building and improving machine learning models for a SaaS platform that recommends internships to students based on skills and profile data.
- Performing data preprocessing and feature engineering on student and internship profile data using Pandas and NumPy to improve model input quality.
- Evaluating model performance and applying hyperparameter tuning with GridSearchCV and RandomizedSearchCV to optimize Scikit-learn models.

Freelance Data Engineer & Automation Developer — *Fiverr*

2025 – Present

- Engineered scalable web scraping pipelines with Scrapy and Selenium to automate structured, multi-domain data collection for client projects.
- Architected reusable, modular pipelines for data preprocessing, transformation, and storage, reducing manual data handling.
- Delivered clean, analysis-ready datasets to clients, significantly cutting downstream preprocessing effort and turnaround time.

Technical Writer — *Medium*

2025 – Present

- Authored technical articles on Python, machine learning, automation, and data engineering, translating applied concepts into practical, accessible guides for a public audience.

Hackathon Competitor — *Various Competitions*

2026 – Present

- Rapidly prototyped machine learning backends and REST API integrations under strict time constraints across multiple competitive hackathons.

PROJECTS

ClosestAI — AI Wardrobe Stylist (*FastAPI, React, ML, Computer Vision*)

- Engineered a full-stack AI styling application with a FastAPI backend and React frontend, including a computer vision pipeline for automatic garment color extraction.
- Designed a 6-dimension outfit scoring engine and a feedback-driven "Style DNA" model that learns user preferences over time to personalize recommendations.
- Built a wardrobe gap analysis feature to identify missing clothing categories and improve recommendation coverage.

[Live Demo](#) | [GitHub](#)

AI-Based Road Accident Risk Prediction System (*Python, Scikit-learn, Pandas, NumPy*)

- Trained and evaluated classification models on real-world accident data, achieving ~75% test accuracy.
- Tuned decision thresholds to prioritize recall on high-severity cases, reducing false negatives in a safety-relevant prediction task.

[Live Demo](#) | [GitHub](#)

Customer Churn Prediction System (*Python, Scikit-learn, Streamlit*)

- Built and deployed a scikit-learn classification model behind an interactive Streamlit app that predicts telecom customer churn likelihood in real time.

[Live Demo](#) | [GitHub](#)

Trader Performance vs. Market Sentiment (*Python, NLP, Data Analysis*)

- Applied NLP-based sentiment analysis to correlate market sentiment data with trader performance, surfacing actionable financial insights.

[GitHub](#)

Hackathon ML Backend (*Python, Machine Learning, REST APIs*)

- Built the core machine learning infrastructure and prediction models powering a hackathon project, exposed via a REST API consumed by the team's frontend.

[GitHub \(Frontend Repo\)](#)

EDUCATION

B.Tech — Artificial Intelligence & Data Science

2024 – 2028

Shah and Anchor Kutchhi Engineering College, Mumbai | CGPA: 8.62 / 10

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Artificial Intelligence, Machine Learning, Probability & Statistics

CERTIFICATIONS

Python & C Training — IIT Bombay | PCA — Coursera | Pandas: Data Manipulation — Kaggle | Data Analytics Job Simulation — Forage
